

# V SERIES

## THE V7 SUPERCARDIOID DYNAMIC

Lush, vibrant studio sound in the palm of your hand.

The innovative, specialized aluminum voice coil in the V7 has been custom-developed for a crisp, open sound that perfectly captures your voice and instruments in the most natural way you've ever heard on stage, and provides vast amounts of gain before feedback.

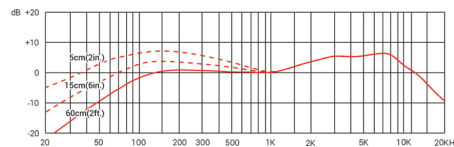

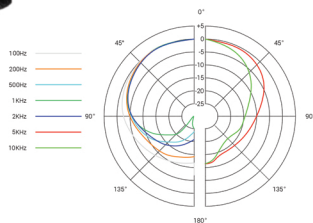

It can take a beating too - the all-metal construction and beveled spring steel grille make the V7 a rugged, reliable companion for the road, and the internal windscreen & patented integrated shock mount keep the capsule safe from plosives and wind while providing exceptionally low handling noise.

## THE V3 CARDIOID DYNAMIC

The V3 shares the same all-metal construction, spring-steel grille, integrated windscreen & patented shockmount as its big brother. With a high-grade cardioid capsule (rather than the V7's supercardioid), it is equally at home on vocals and acoustic or amplified instruments.

A rugged dynamic workhorse fit for any stage.

Both the V7 and V3 come complete with a storage pouch, mic clip, stand thread adapter, and a spare black windscreen (just in case red isn't your thing).

*Robust build. Exceptional sound. The V Series Dynamics.*
