USER MANUAL

52x30mm（掏空）
4R-10
Professional stage lighting equipment

Table of content

1.Open-Package guidelines

Congratulations on choosing our products! Please carefully read this instruction manual in its entirety and keep it well for using reference. This manual contained about the installation and the relative using information of this products.Please according to this manual's relative instruction when using this equipment.

This equipment is made of new style,high intensity plastic.It fully shows the modem times light charac teristic with teristic with beauty struture. And it is made accord to CE standard. Fully agree with the internation standard of DMX512 agreement.

When receive the product,please be careful to take and put,check if the product has damage or not because of transportation, and check the following parts:

1.Signal cable-1PC   2.Safty cable-1PC
3.User Manval-1PC   4.Omega holder-2PCS
5.Power cable-1PC   5.Service card-1PC

1.1 Package

Unpacking the fixture

1.Open the flight case cover

2.With one person on each side, lift the fixture out of the flight case.

3.Unlock pan and tilt before operating fixture

Packing the fixture

1.Disconnect the fixture from power and allow it to cool.

2.lock arms as figure.- Fig.1(PAN Mechanism Lock and Release (every 90°) - Fig.2)

3.Place the fix ture in the bottom of the flight case, and cover the case without forcing.
Note: to prevent the lamp damaged, focusing lens must return, can be placed in the box.

2.Safety instructions

Every person involvd with installation and maintenance of this device to:

-Be qualilfied

-Follow the instructions of this manualentertainment theater,performing and palying hall etc.

CAUTION!
Be careful with your operations.
With a high voltage you can suffer
a dangerous electric shock when touching the wires!

This device has left our premises in absolutely perfect condition.In order to maintain this condition and to-ensure a safe operation ,it is absolutely necessary for the user to follow the safety instructions and warning notes written in this manual.

Important:

➢ The manufacturer will not accept liability for any resulting damages caused by the nonobservance of this manual or any unauthorized modification to the device.

➢ Please consider that damages caused by manual modifications to the device are not subject to warranty.

➤Never let the power-cord come into contact with other cables! Handle the power cord and all connections with particular caution!
➤Make sure that the available voltage is not higher than stated on the rearpanel.
➤Always plug in the power plug least. Make suer that the power-switch is set to off-position before you con ections with themains with particular caution!
➤Make sure that the power-cord is never crimped or damaged by sharp edges.Check the decice and the p-ower-cord from time to time.
➤ Always disconnect from the mains, when the device is not in use or before cleaning it.
➤Only handle the power-cord by the plug,Never pull out the plug by tugging the powercord.
➤This device falls under protection class I.Therefore it is essential to connect the yellow/green conductor to earth.
➤ The electric connection,repairs and servicing must be carried out by a qualifids employee.
➤ Do not connect this device to a dimmer pack.
➤ Do not switch the fixture on and off in short intervals as this would reduce the lamp's life.rly mean that the device is defective.
➤Do not touch the device's housing bare hands during its operation(housing becomes hot)!
➤For replacement use lamps and fuses of same type and rating only.

Caution! eyebamages!
Avoid looking directly into the light source(meant especially for epileptics)!

LED ❨0.2 ❩

➤Minimum distance of illuminated objects
The projector needs to be positioned so that the objects hit by the beam of light are at least 0.20 metres (8〞) from the lens of the projector.

tₐ 40℃

➤Maximum ambient temperature
Do not operate the fixture if the ambient temperatuer(Ta) exceeds 40℃ (104℉).

t_c 90℃

➤Temperature of the external surface
The maximum temperature that can be reached on the external surface of the fitting,in a ther-mally steadystate, is 90℃ (194℉).

IP20

➤IP20 protection rating
The fitting is protected against penetration by solid of over 12mm（0.47"）in diameter（first digit 2), but not against dripping water,rain,splashes or jets of water (second digit 0).

⌂

➤Indoor use only

🚫

➤Not suitable for household illumination

⚠
Risk Group 2
According to
En62471

➤Photobiological Safety
CAUTION.Possibly hazardous optical radiation emitted from this product. Do not stare at operating lamp. May be harmful to the eyes.

➤Light collimation system
This product contains internal light collimation system. Avoid intense light from any angle.

CE

➤The products to which this manual refers comply with the European Directives purs-uant to :
•2006/95/EC - Safety of electrical equipment supplied at low voltage（LVD）
•2004/108/EC - Electromagnetic Compatibility (EMC)
•2011/65/EU - Restriction of the use of certain hazardous substances (RoHS)
•2009/125/EC - EcoDesign requirements for Energy-related Products (ErP)

⏚

➤Protection against electrical shock
Connection must be made to a power supply system fitted with efficient earthing (Class I app-liance according to standard EN 60598-1).It is, moreover, recommended to protect the supply lines of the projectors from indirect contact and/orshorting to earth by using appropriately sized residual current devices.

> Disposing
> This product is supplied in compliance with European Directive 2012/19/EU-Waste Electrical and Electronic Equipment (WEEE).To preserve the environment please dispose/recycde this product at the end of its life according to the local regulation.

> Battery
> This product contains a rechargeable lead-acid or lithium iron tetraphosphate battery. To pre-serve the environment,please dispose the battery at the end of its life according to the regul-ation in force.

3.Operating determinations

> This device is a moving-head for creating decorative effects and was deaigned for indoor use only.

> If the device ha been exposed to drastic temperature fluctuation(e.g.after transportation).do not weitch it on immediately.The arising condensation water might damage your device,Leave the device switched off until it has reached room temperature.

> Never run the device without lamp!

> Do not shake the device,Avoid brute force when installing or operating the device.

> Never life the fixture by holding it at the projectorhead, as the mechanics may be damaged. Always hold the fixture at the transport handles.

> When choosing the installation-spot,please make sure that the device is not exposed to heat,moisture or dust.There should not be any cables lying around.You endanger your own and the safety of others!

> The minimum distance between light output and the illuminated surface must be more than 0.2 meters.

> Make sure that the area below the installation place is blocked when rigging,derigging or servicing the fixture.

> Always fix the fixture with an appropriate safety rope, Fix the safety rope at the correct holes only.

> Operate the fixture after having checked that the housing is firmly closed and all screws are tightly faste-nd.

> The lamp must never be ignited if the objective-lens or any housing-cover is open, as discharge lamps may explose and emit a hign ultraviolet radiat, which may cause burns.

> The maximum ambient temperature 40° C must never be exceeded.

> Operate the device only after having familiarized with its functions. Do not permit operation by persons not qualified for operating the device. Most damages are the result of unprofessional operation!

> Please use the original packaging if the device is to be transported.

> Please consider that unauthorized modifications on the device are forbidden due to safety reasonsl.

> If this device will be operated in any way different to the one described in this manual, the product may suffer damages and the guarantee becomes void.Furthermore, any other operation may lead to dangers like short-circuit,burns, electric shict,burns due to ultraviolet radiation,lamp explosion,crash etc.

4.Rigging the fixture

4.1 Mounting

☞For the various mounting positions of the FIXTURE(standing on the floor, sideways or hanging different accessories kits are available.

☞Through this a safe and firm installation is assured.

☞You'll find special connectors on the bottom side of the system which are put to use here.

4. 2 Installing the Clamps

Please consider the respective national norm s during the Installation!The installation must only be carried out by an authorized dealer！

The installation of the projector has to be built and constructed in a way that it can hold 10 times the weight for 1 hour without any harming deformation.

The installation must always be secured with a secondary safety attachment, e.g.an appropriate catch net.This secondary safety attachment must be constructed in a way that no part of the installation can fall if the main attachment fails.

When servicing the fixture staying in the area below the installation place,on bridges,under high working places and other endangered areas is forbidden.

The operator has to make sure that safety-relating and machine-technical installations are approved by an expert before taking into operation for the first time and after changes before taking into operation another time.

The operator has to make sure that safety-relating and machine-technical installations are approved by an expert after every four year in the course of an acceptance test.

The operator has to make sure that safety-relating and machine-technical installations are approved by a skilled person once a year.

The projector should be installed outside areas where persons m ay walk by or be seated.

Important!Overhead rigging requires extensive expering CE, including（but not limited to）calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the projector. If you lack these qualifications, do not attempt the installation yourself, but instead use a professional structural rigger. Improper installation can result in bodilyinjury and or damage to property.

The projector has to be installed out of the reach of people.

If the projector shall be lowered from the ceiling or high joists, professional trussing system s have to be used. The projector must never be fixed swinging freely in the room .

Caution Projectors may cause severe injuries when crashing down! If you have doubts concerning the safety of a possible installation, do not install the projector!

Before rigging make sure that the installation area can hold a minim um point load of 10 times the projector s weight.

The projector can be placed directly on the stage floor or rigged in any orientation on atruss without alte-ring its operation characteristics.

For overhead use,always install a safety-rope that can hold at least 10 times the weight of the fixture.You must only use safety-ropes with screw on carabines.Pull the safety-rope through the two apertures on the bottom of the base and over the trussing system etc.

⚠ **Warning**: it is necessary to make sure that the installation location is perfectly appropriate, and the installation location is safe and reliable.

③	secure chain
④	mounting plate
4.3 Power supply connection and cut off

Connect the light source to the main power source with the plug of the power cord, or cut off the power supply:

Connection: according to procedures, the power plug and socket is inserted into the groove one one alignment, rotation.

Cut off: according to procedures, press the button on the rotating plug, pull out.
4.4 Power Connection

If you wish to change the power supply settings, see the chapter appendix Connect the fixture to the mains with the enclosed power cable and plug.

⚠️ **Warning:** please verify the power of the power supply equipment prior to the connection! Earth wire must be grounded!

4.5 DMX–512 connection/connection between fixtures

Only use stereo shieded cable and 3-pin XLR-plugs and connectors in order to connect.

DMX512

DMX512
Caution

At the last fixture,the DMX-cable has to be terminated with a terminatou. solder a 120 resistor between signal(-) and Signal (+) into a 3-pin XLR-plug and plug it in the DMX-output of the last fixture.

DMX output
3-pin XLR socket

4 : N. A.
5 : N. A.

DMX Terminator Diagram

-For installations where the DMX cable has to run a long distance or is In an electrically noisy environment it is recommended to use a DMX terminator. This help in preventing corruption of the signal by electrical noise. The DMX terminato r is simply an XLR plug witha 120Ω resistor connected between pins 2 and pins3, which is then plugged into a the output XLR socket of the last ifxture in the chain.

7.Display control

7.1 Navigation in the Menu

Using the buttons or touch screen, and this can be simply and easily set the address code and functions code.

If you view or modify the lighting feature set, then press ENTER button, the display will enter the menu interface. Both there is sub menu corresponding to the functional operation of the main menu. Each of the menus is representative of the specific features of the lamp. The specific contents shows as the table menu below.

Set or browse lighting function, press UP or DOWN button.

Press ENTER to save your changes or enter the submenu.Press the UP or DOWN can change the numerical (increase or decrease in value).

Press the MODE button to return to menu. Set a time 0 to 10 minutes automatically exit menu interface and close the screen.

7.2 Display Operation

Put through power supply, open the power switch of lamps and lanterns, display show the company LOGO website. According to the main interface, as shown in figure:

In the main interface, press "MODE" button to view the software version, press the "UP" "DOWN" can modify the DMX address.

If the screen "⊙" icon is green,said DMX signal connection is normal, this state can be used to check the elamps and lanterns and connection between the control table is normal.

This lamp contains"🅐" ""🅑"two control modes are optional,see below; (A mode, also known as unit mode, its function as a network and only a single control console .B mode known as multivariate models,its function as a network and control console merge or separate two options.)

A mode menu interface

This lamp can be set to turn off the automatic flip screen function, touch this " ↻ " icon can be manually flip screen.

Function

| CHANNEL FUNCTION	DMX VALUE
To activate following functions, stop in DMX value for at least 5 seconds(Use of the light channel):	
Reserved	0–11
Pan Tilt Fast (Default)	12–24
Pan Tilt Normal	25–37
Dimmer Curve 1	38–42
Dimmer Curve 2	43–47
Dimmer Curve 3	48–52
Dimmer Curve 4	53–57
RGB Gamma curve(gamma=1.0)	58–62
RGB Gamma curve(gamma=1.5)	63–67
RGB Gamma curve(gamma=2.0)	68–72
Activation of the following functions ninth channel linear CTO is automatically shut down	
Halogen Lamp Simulation OFF (Default)	73–77
Halogen Lamp Simulation,type1 (750W)	78–82
Halogen Lamp Simulation,type2 (1000W)	83–87
Halogen Lamp Simulation,type3 (1200W)	88–92
Halogen Lamp Simulation,type 4 (2000W)	93–97
Halogen Lamp Simulation,type 5 (2500W)	98–102
Reserved	103–255

DIMMER CURVE 1 - GAMMA 1 LINEAR
DIMMER CURVE 3 - GAMMA 2,0

DIMMER CURVE 2 - GAMMA 1,5
DIMMER CURVE 4 - S
LED reference number for pixel mapping
TILT: channel 16 @ 200 bit

9.Maintance and cleaning

DANGER:Disconnect from the mains before starting any maintenance work.

It is absolutely essential that the fixture is kept clean and that dust,dirt and smoke fluid residues must not buildup on or within the fixture. Otherwise, the fixtures light-output will be significantly reduced. Regular cleaning will not only ensure the maximum light-output, but will also allow the fixture to function reliably through out its life. A soft lint-free cloth moistened with any good glass cleaning fluid is recommended, under no circum stances should alcohol or solvents be used!

The front objective lens will require weekly cleaning as smoke-fluid tends to building up residues,reducing the light-output very quickly.The cooling-fans should be cleaned monthly.

The gobos may be cleaned with a soft brush,The interior of the fixture should be cleaned at least annually usinga vacuum-cleaner or an air-jet.

There are no serviceable parts inside the device except for the lamp and the fuse.

Replacing the fuse: If the lamp burns out,the fine-wire fuse of the device might fuse,too.Only replace the fuse by a fuse of same type and rating.Before replacing the fuse,unplug mains lead.

Maintenance and maintenance of the operation, please contact the manufacturer or distributor.

10.Electric equipment specification

10.1 Electrical paramters

SOURCE:RGBW LED-15W
POWER:750W
VOLTAGE:AC100-240V 50/60HZ
Color Temperature:6500K

10.2 Weight and dimensions

Dimensions：390X287X580mm
NET WEIGHT:22Kg
Dimensions（Paper skin）：596X491X656mm
WEIGHT（Paper skin）:28Kg
Dimensions（Air boxes -2 lights):805X525X815mm
NET WEIGHT/WEIGHT（Air boxes -2 lights）：36Kg/61Kg

10.3 Channel Characteristics

1. 21、35、132、169、146five standard DMX channel model or 21、35 two standard DMX channel model and network control mode optional.

2. Scan**:** Pan540° **,**Tilt210° **,**Fixture could auto reset.

3. Demmer**:** limear dimmer.

5. Zoom:linear amplifier.。

6. Enlarged rotation:Can be 360° degrees clockwise, counterclockwise rotation.

7. 37 RGBW lamp can be controlled separately.

8. The network control mode and DMX control mode have independent control and combined control.

9. Shutter**:** electronic shutter**,** random strobe.
10. Focus**:** linear focus.

10.4 Menu Function

1．Touch screen，English menu.

2．DMX values and communication quality values can be displayed in each channel. .

3．Monitor could ON／OFF automatically.

4．Show fixture use time.

5．After the DMX signal is disconnected, the display will be bright and dark.

6．The screen can be set automatically to flip or hand over.

7．Auto error detection.

8．Wireless input,wired input,wirelss in/xlr out,ETHNET input.

9．With DMX software upgrade.

10．5 seconds after the DMX signal is disconnected, the amplification is automatically retracted.
